Flutter

BLoC / Cubit

Clean Architecture

REST + Dio

Firebase

Production Flutter, from API to interface.

Junior Flutter Developer with 1+ year of professional experience delivering mobile applications across booking, delivery, social, e-commerce, healthcare, and automotive domains. Skilled in BLoC/Cubit state management, Clean Architecture, and RESTful API integration, with experience building multilingual, responsive user interfaces. Comfortable moving across different app domains and adapting quickly to each project's structure and business logic.

Comfortable moving between product domains — and picking up each project's structure and business logic without a long ramp.

EDUCATION

BSc. Degree, Information Technology

Egyptian E-Learning University (EELU) · Sept. 2021 – Jun. 2025 · Grade: A+ (Graduation Project: YourSeat) Fayoum Branch

CERTIFICATIONS

Flutter Development Diploma

Route IT Training Center · May 2023 – Nov. 2023 · Accredited by the Egyptian Syndicate of Engineers · 120 hours, 5 practical projects

LANGUAGES

Arabic — Native

English — Professional working proficiency

01

Responsive by default

Screens built from UI/UX designs that hold up across phone and tablet sizes, working closely with designers and backend developers.

02

Stateless screens, predictable state

Fully stateless, testable UI in a feature-based folder structure, with consistent handling for loading, error and empty states.

03

APIs that survive real networks

RESTful integration with Dio — pagination, pull-to-refresh, and secure payment and notification flows.

04

Comfortable changing domains

Consultation booking, property booking, delivery and social — adapting quickly to each project's structure and business logic.

The stack, grouped by what it does.

Four featured products, shipped end to end.

Consultation, property booking, delivery logistics and social — delivering production-ready Flutter applications for clients across the Gulf and Egyptian markets.

Application for laundry pickup and delivery customers, covering order creation with scheduling, checkout with coupons and wallet, live order tracking, order history with reorder and rating, saved addresses on the map, authentication with password recovery and an account section, plus a support system with complaints and FAQs. I developed the UI and integrated the RESTful APIs.

MY ROLE

UI development · REST API integration

PLATFORM

iOS · Android

CONTEXT

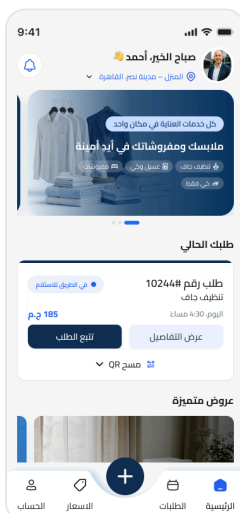

Nahr Development

KEY FEATURES

- Order creation with pickup and delivery scheduling
- Checkout with coupons and wallet
- Live order tracking on Google Maps
- Order history with reorder and rating
- Saved addresses picked on the map
- Authentication with password recovery
- Support system with complaints and FAQs

BUILT WITH

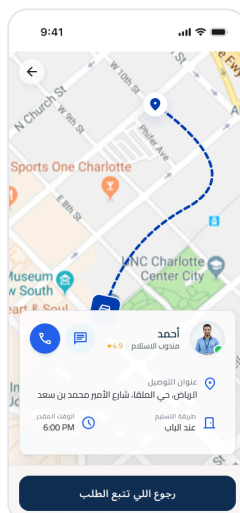

Flutter Dart Cubit Clean Architecture
REST APIs Dio GetIt Dartz
Easy Localization Secure Storage
Shared Preferences Google Maps Geolocator
Firebase Cloud Messaging Local Notifications

Home — offers, current order and quick tracking

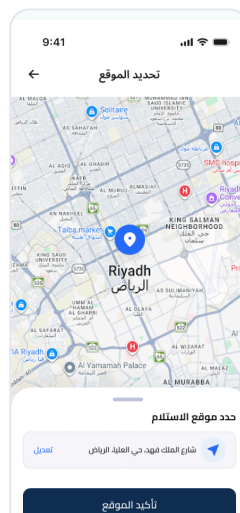

Create order — step-by-step with pickup address

Live tracking — driver route, ETA and contact

Prices — per service and garment category

Pickup location — choose the address on the map

Laundo Delivery

Application for laundry pickup and delivery drivers, covering task management and details with live tracking, QR scanning, signature capture, task history, authentication with password recovery and an account section for personal info, documents and service areas, plus a support system with tickets, complaints and FAQs. I developed the UI and integrated the RESTful APIs.

MY ROLE

UI development · REST API integration

PLATFORM

iOS · Android

CONTEXT

Nahr Development

KEY FEATURES

- Task management and task details with live tracking
- QR scanning for order handover
- Signature capture on delivery
- Task history with status filters
- Account section — personal info, documents and service areas
- Authentication with password recovery
- Support system with tickets, complaints and FAQs

Driver login — phone number and password

Home — availability, daily summary and current task

Tasks — search and filter by status

History — completed and failed pickups and deliveries

Qarar

Flutter consultation-booking app for clients and service providers. I set up the project and its architecture, built the networking layer, authentication with OTP, onboarding, profiles and account security, financial transactions, certificates, charity committees, help center, notification badges and theme management, and improved bookings with pagination, filtering and shimmer loading.

MY ROLE

App architecture · UI development ·
REST API integration

PLATFORM

iOS · Android

CONTEXT

Nahr Development

KEY FEATURES

- Project setup, architecture and networking layer
- Authentication with OTP and onboarding
- Profiles and account security
- Financial transactions and certificates
- Charity committees and help center
- Bookings with pagination, filtering and shimmer loading
- Notification badges and theme management

Git

Splash — the Qarar brand mark

Home — categories and featured experts

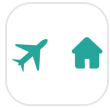

Specialties — financial advisors and market insight

Legal experts — ratings, session price and booking

Charity committee — details and supported cases

04 · Travel & property booking

Book Iraq

Flutter booking application covering search, property listings, the booking flow and reservation management. I developed UI screens and integrated RESTful APIs, with recent work on the FCM token flow and async Cubit lifecycle stability.

MY ROLE

UI development · REST API integration

PLATFORM

iOS · Android

CONTEXT

Nahr Development

KEY FEATURES

- Hotel search and property listings
- Booking flow and reservation management
- Hotel detail with gallery, policy, reviews and map location
- Favourites across stays and attractions
- Taxi and transport booking, one-way or round-trip
- Push notification registration via FCM token flow

BUILT WITH

Flutter

Dart

Cubit

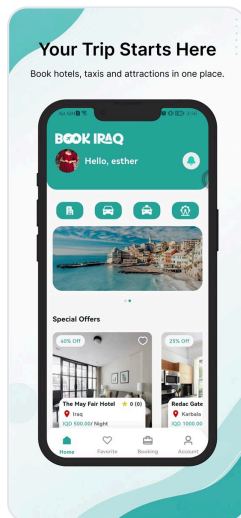

Clean Architecture

REST APIs

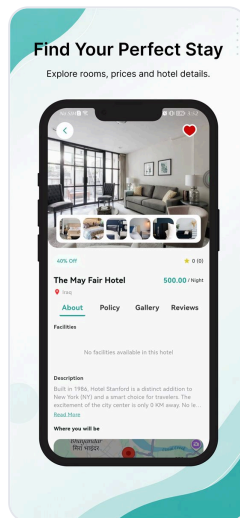

Dio

Firebase

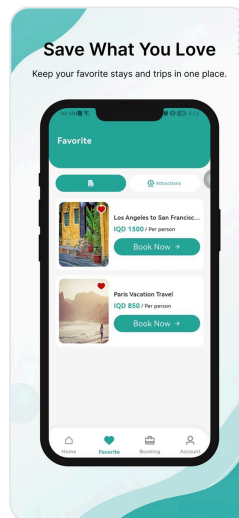

FCM

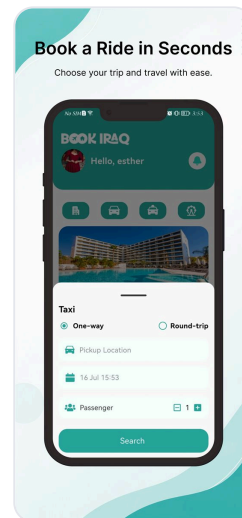

Home — categories, offers and featured stays

Hotel detail — gallery, policy, reviews and location

Favourites — saved stays and attractions

Taxi booking — trip type, pickup, date and passengers

05 · Delivery & driver logistics

Fresh Driver

Delivery mobile application built with Flutter. I implemented the RESTful API integration and Google Maps for real-time order tracking and delivery management.

MY ROLE

REST API integration · Google Maps integration

PLATFORM

iOS · Android

CONTEXT

Nahr Development

KEY FEATURES

- Incoming order queue with accept and decline
- Availability toggle that controls new order visibility
- Real-time route and delivery tracking on Google Maps
- Order detail with pickup and drop-off addresses
- Wallet balance and payout history

BUILT WITH

Flutter

Dart

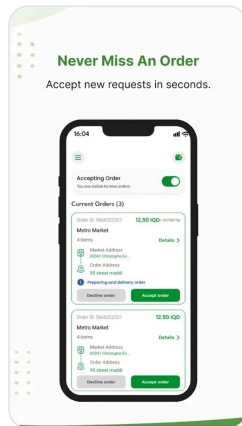

Cubit

REST APIs

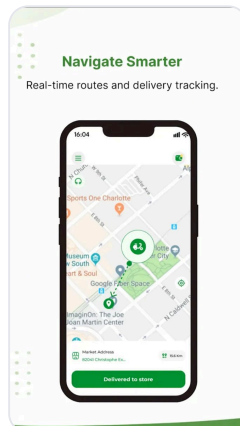

Dio

Google Maps

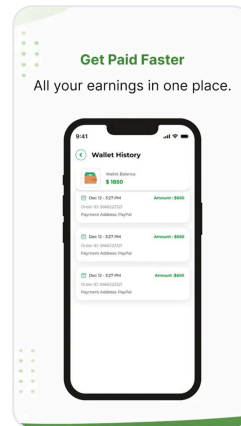

Firebase

Order queue — accept or decline in seconds

Live tracking — route and distance to the store

Wallet — balance and payout history

06 · Social media

Quartz

Flutter social media app with posts, comments, likes and saved posts. It supports creating posts with images or polls, sharing posts, and a profile section for editing name, nickname and photo. I developed the UI and integrated the RESTful APIs.

MY ROLE

UI development · REST API integration

PLATFORM

iOS · Android

CONTEXT

Nahr Development

KEY FEATURES

- Posts with comments, likes, sharing and bookmarks
- Post composer supporting images or polls
- Threaded replies on every post
- Nearby discovery within a set radius
- Profile editing — name, nickname and profile photo
- Saved posts and account management

BUILT WITH

Flutter

Dart

Clean Architecture

REST APIs

Dio

Hive

Shared Preferences

Splash — the Quartz brand mark

Home feed — local posts, tags and reactions

Post thread — replies and likes

Nearby — discover people within range

Profile — stats, points and account settings

07 · Seat reservation · Cinema

YourSeat

Seat reservation platform built as a team graduation project. I contributed to Flutter UI development, Firebase integration, the AI features and a Flutter Web admin dashboard.

MY ROLE

Flutter UI · Firebase · AI features ·
Web admin dashboard

PLATFORM

iOS · Android · Flutter Web

CONTEXT

Graduation project · Grade: A+

KEY FEATURES

- Onboarding and movie discovery — Now Playing and Coming Soon
- Interactive seat map with available, reserved and VIP seats
- Date and showtime selection with a live running total
- AI assistant that recommends films on request
- Firebase integration
- Flutter Web admin dashboard

BUILT WITH

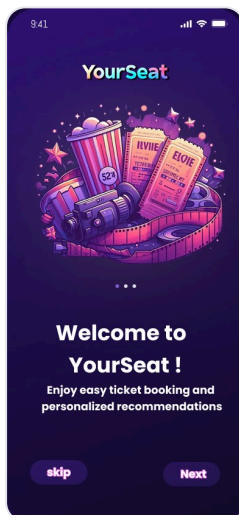

Flutter

Dart

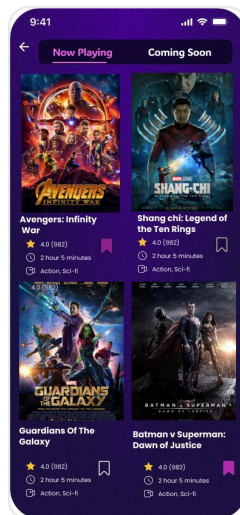

Firebase

Flutter Web

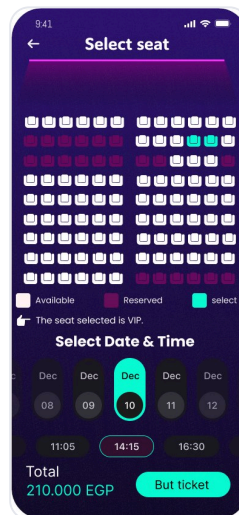

AI Assistant

Onboarding — first-run introduction

Now Playing — ratings, runtime and genre

Seat map — availability, VIP tiers and showtime

AI assistant — conversational recommendations

ALSO SHIPPED · 11 more

Trimly Freelancer booking application

[UI development](#) · [REST API integration](#)

OVERVIEW

Built customer booking requests (upcoming/completed/complaints), the freelancer chat, freelancer profile and portfolio (image/video/PDF), freelancer wallet, push notifications for both roles, and map-based location selection for subscriptions. Developed the UI and integrated RESTful APIs using Clean Architecture with Cubit state management.

TECHNOLOGIES

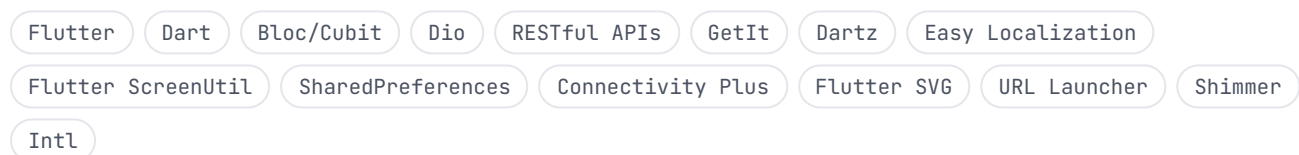

MAS Multi-service application

[Networking layer](#) · [REST API integration](#) · [UI](#)

OVERVIEW

Built the networking layer and connected the app to the backend: phone OTP login, onboarding, profile and logout, orders list and details, order tracking, Help Center, Loyalty Points, Rewards and Referral, Terms and Privacy. Redesigned the onboarding, language, and service-detail screens with a feature-based Clean Architecture. Developed the UI and integrated RESTful APIs using Bloc/Cubit.

TECHNOLOGIES

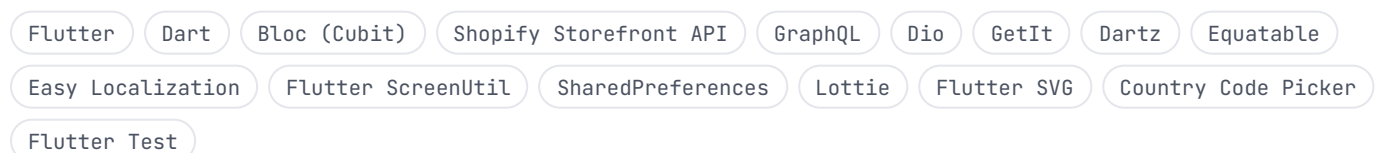

Rawdy Shopify e-commerce application

[GraphQL data layer](#) · [UI development](#)

OVERVIEW

Customer authentication & registration, profile management, address book (CRUD, country selection, validation), order history & order details, guest mode with auth guard, runtime Arabic/English switching with RTL, localized API error handling. Migrated the networking layer to Shopify Storefront GraphQL, built the data layer, and integrated the APIs into the app's UI.

TECHNOLOGIES

Shahy Eissa Site & worker management application

UI development · REST API integration

OVERVIEW

Implemented Worker Profile, Site Photos gallery, Materials, Reports and Activity Log modules, and enhanced Worker Monitoring, Home Manager and Marble Promo screens. Developed the UI and integrated RESTful APIs, replacing mock data with live endpoints.

TECHNOLOGIES

- Flutter
- Dart
- Bloc/Cubit
- Dio
- GetIt
- Dartz
- Easy Localization
- ScreenUtil
- Shimmer
- Flutter SVG

Re3ayaPlus Healthcare application

Localization · UI development · REST API integration

OVERVIEW

Implemented bilingual Arabic/English support (with RTL/LTR) plus the Settings, Profile Info, Language Selection and Terms/Support screens, and made the network layer send the user's selected language. Built new feature screens, integrated the Definitions REST endpoint, and refactored large existing screens into modular, reusable widgets.

TECHNOLOGIES

- Flutter
- Dart
- Bloc (Cubit)
- easy_localization
- Dio
- dartz
- Flutter ScreenUtil
- flutter_svg
- SharedPreferences

Yummy Diet Diet & meal subscription application

UI development · Shared UI kits · Refactoring

OVERVIEW

Built the Yummy Kids module (child profiles, kids' subscription and plans, meal selection, Today's Meals, Kids Home, daily gift, calorie calculator) and turned repeated Adult/Kids screens into shared UI kits (plans, duration, subscription, meal schedule, cart, checkout). Refactored existing screens for RTL support, accessibility, performance and a consistent design system. Developed the UI and restructured teammates' screens into reusable, tested components.

TECHNOLOGIES

- Flutter
- Dart
- Bloc (Cubit)
- Equatable
- Easy Localization
- ScreenUtil
- Flutter SVG
- Shared Preferences
- Fortune Wheel
- Flutter Test

Full Day 24 Flutter application

UI development

OVERVIEW

Built the authentication flow (Welcome, Login, Register, OTP verification, Forgot/Reset Password) and the account support screens (Help/FAQ, Contact Us, Invite Friend, Privacy Policy), with bilingual Arabic/English UI, shimmer loading states, and reusable form widgets. Developed responsive, pixel-accurate Flutter UI with Cubit state management.

TECHNOLOGIES

- Flutter
- Dart
- Bloc (Cubit)
- Flutter ScreenUtil
- Easy Localization
- Shimmer
- Flutter SVG
- Pinput
- Flutter HTML
- URL Launcher

Fresh Market Grocery shopping application

[UI development](#) · [REST API integration](#)

OVERVIEW

Built language switching with backend sync (including the profile language settings) and the logout flow. Enhanced the Arabic/English localization, Firebase push notifications, the order summary breakdown (fees, tax, promo discount, net amount), and 401/403 handling that sends the user back to login. Developed the UI and integrated RESTful APIs using Cubit state management.

TECHNOLOGIES

Flutter Dart Bloc (Cubit) Dio GetIt Dartz Easy Localization Firebase Cloud Messaging
Flutter Local Notifications SharedPreferences Flutter ScreenUtil Gradle

Car Club Automotive services application

[UI development](#) · [State management](#)

OVERVIEW

Carnet de Passage booking (multi-step form), International Driving License, Customs Clearance with document upload, Quick Registration, Payment & Credit Card checkout, Wallet, Order Success & Tracking, Branches, Notifications, plus refactoring of Auth/OTP, Onboarding and Home flows. Developed the UI and state management for these features end-to-end using Bloc/Cubit.

TECHNOLOGIES

Flutter Dart Bloc/Cubit GetIt Easy Localization Flutter ScreenUtil Flutter SVG

- Flutter
- Dart
- BLoC
- Cubit
- Clean Architecture
- Dio
- REST APIs
- Firebase
- FCM
- Google Maps
- PayMob

KEY CONTRIBUTIONS

- 01 Collaborate with the Flutter team, backend developers, and UI/UX designers to implement features and resolve technical issues.
- 02 Build responsive and scalable mobile applications using Flutter, Dart, BLoC/Cubit, Clean Architecture, and RESTful APIs.
- 03 Develop and maintain Flutter applications for clients across the Gulf and Egyptian markets, contributing to features from implementation through release.

What I bring to your product team.

Full-cycle Flutter mobile development from UI engineering to clean state management, API integration, and third-party services.

01

Core Focus

Cross-Platform Mobile Apps

End-to-end mobile app development for iOS and Android using Flutter & Dart. Clean code, high responsiveness, and platform-native feel.

- ✓ iOS & Android builds
- ✓ Responsive phone & tablet UI
- ✓ Offline caching & persistence
- ✓ App store compliance

02

Architecture

State Management & Architecture

Structuring scalable and maintainable Flutter applications using BLoC/Cubit, Clean Architecture, and strict separation of concerns.

- ✓ BLoC / Cubit implementation
- ✓ Clean Architecture layers
- ✓ Repository pattern & DI
- ✓ Testable business logic

03

REST API & Backend Integration

Connecting mobile apps with backend RESTful services, JSON APIs, and cloud services with robust error handling and token authentication.

- ✓ Dio client setup & interceptors
- ✓ JWT Auth & Refresh tokens
- ✓ Firebase integration
- ✓ Real-time data handling

04

Integrations

Payments, Maps & Notifications

Wiring the integrations real products depend on — PayMob payments, Google Maps tracking, and Firebase Cloud Messaging push notifications.

- ✓ PayMob payment flows
- ✓ Google Maps & live tracking
- ✓ FCM push notifications
- ✓ Local storage with Hive

05

Figma to Flutter UI/UX

Translating design prototypes into pixel-perfect Flutter widgets with micro-animations, smooth transitions, and custom themes.

- ✓ Pixel-perfect screen coding
- ✓ Smooth 60fps micro-animations
- ✓ Light & Dark mode themes
- ✓ Custom interactive components

06

Performance & App Refactoring

Auditing, optimizing, and fixing existing Flutter codebases to eliminate frame drops, minimize memory leaks, and upgrade legacy packages.

- ✓ Repaint boundary profiling
- ✓ Memory leak elimination
- ✓ Widget rebuild optimization
- ✓ Code refactoring & bug fixing

Let's build something that ships.

Open to Flutter roles and freelance work. Feel free to reach out via email, WhatsApp, or LinkedIn.
