

Ahmed Esam Abdelsalam

Junior Flutter Developer

ahmedesam2772@gmail.com | +20 101 783 7378 | El Fayoum, Egypt

PROFESSIONAL SUMMARY

Junior Flutter Developer with 8+ months of professional experience delivering mobile applications across consultation/service-booking, property booking, and delivery domains. Skilled in BLoC/Cubit state management, Clean Architecture, and RESTful API integration, with particular strength in building RTL-aware, Arabic-first interfaces. Comfortable moving across different app domains and adapting quickly to each project's structure and business logic.

SKILLS

- **Languages & Frameworks:** Dart, Flutter, Java, Python, C++, HTML, CSS, JSON
- **Architecture & Patterns:** Clean Architecture, MVVM, Feature-based Structure
- **State Management:** Bloc, Cubit, Provider
- **Backend & Integration:** RESTful APIs, HTTP, Dio, Firebase, FCM, Google Maps, PayMob Payment Integration
- **Data & Storage:** Hive, Shared Preferences
- **UI & Localization:** Responsive UI, Flutter Web, RTL, LTR Layouts, Localization, i18n, Dependency Injection
- **Conceptual Knowledge:** OOP, Algorithms, Data Structures, Problem-Solving
- **Tools:** Android Studio, VS Code, Postman, Jira, Git, GitHub
- **Soft Skills:** Teamwork, Collaboration, Attention to Detail, Adaptability, Creativity

PROFESSIONAL EXPERIENCE

Junior Flutter Developer — NahrDevelopment

December 2024 – Present | Remote (El Fayoum, Egypt)

- Develop and maintain features across multiple Flutter applications, including Qarar, Booking, and Rawnaq, using BLoC/Cubit state management and Clean Architecture
- Build fully stateless, testable UI screens with feature-based folder structure and consistent state handling for loading, error, and empty states
- Implement RTL-aware, Arabic-first layouts, resolving direction-dependent positioning and localized font rendering issues
- Integrate RESTful APIs with Dio, including pagination, pull-to-refresh, and secure payment and notification flows
- Debug and resolve async lifecycle issues in Cubits and coordinate authentication flows involving OTP verification and push notification registration

SELECTED PROJECTS

Qarar — Consultation booking platform | Egypt

Scheduling platform for voice and video consultations with doctors, lawyers, and financial advisors, including a document upload flow for charity committees. Developed UI screens and integrated RESTful APIs.

Booking Application — Property booking platform

Flutter booking application covering search, property listings, booking flow, and reservation management. Developed UI screens and integrated RESTful APIs, with recent work on FCM token flow and async Cubit lifecycle stability.

Fresh Driver — Delivery driver application

Delivery mobile application built with Flutter. Implemented RESTful API integration and Google Maps for real-time order tracking and delivery management.

Quartz — Social media application

Flutter social media app with posts, comments, likes, and saved/bookmarked posts. Supports creating posts with images or polls, sharing posts, and a profile section for editing name, nickname, and profile photo. Developed the UI and integrated RESTful APIs.

YourSeat — Graduation Project | Team-based

Seat reservation platform. Contributed to Flutter UI development, Firebase integration, AI features, and a Flutter Web admin dashboard.

ADDITIONAL PROJECTS

- **Flutter:** Trimly, Full-day-24, Car Club, Rawnaq — UI development.
- **Shahy Eissa** — UI development and RESTful API integration.
- **MAS** — Multi-service application.
- **Re3ayaPlus, Nagaa** — RESTful API integration.

EDUCATION

Bachelor's Degree, Information Technology

Egyptian E-Learning University (EELU) | Class of 2025 | El Fayoum, Egypt

CERTIFICATIONS

Information Technology Specialist (ITS) – Certiport | CCNA – Cisco | Flutter Development Diploma – Route Academy (120 hours, 5 practical projects)

LANGUAGES

Arabic: Native | English: Professional Working Proficiency
